

Backpack Fixation TYRliner

If there are **exposed sections** of trail or **sections secured with grating stairs** during hikes, you can transport your dog safely on your back with the help of the backpack holder in combination with the dog carrier TYRliner.

Even in case of injuries, the dog can be safely transported to the valley.

The two holding loops are simply **fixed to the shoulder straps of the backpack**. Then the dog carrier belt TYRliner can be hooked into the two carabiners.

Art. No.	93737	
Dimensions	Length:	220 mm
Weight	130 g	
Comments	In pairs with carabiners.
