

## AVALANCHE-TRAININGS-PAD „BODY“

PAD in **human form** in a high-quality fabric combination for realistic training.

**Easily transportable**; water-repellent material. Bag for the integration of a buried victim search device. The device should also be protected against the probe tip. (Avalanche search device not included)

**Fastening straps** for carabiners so that several pads can be linked together for simulation.

A **Recco RescueReflector** for the Recco search can also be attached to the fastening strap. (Recco Reflector not included) A 20x10cm aluminum plate is integrated in the leg area. This is used to simulate different substances.

**Ski poles or ski boots** can simply be **attached** to the pad, thus ensuring a realistic excavation situation.

Developed together with the **Tyrolean mountain rescue Team**.
