

## Carrying harness TYRliner PRO

The further development of the **TRYliner dog harness** in universal size, this harness can be used both for **transport and for rescue** of dogs.

With the help of the two continuous stiffening plates, it is ideal for rope-up and abseiling on the rock, with the **fixed-stitched suspension** also ideal for flights under the helicopter.

- **Adjustable Velcro** surface to fold out for quick size adjustment.
- **Adjustable loops** at the rear legs incl. Velcro cross buckle for optimal grip in the belt. This prevents the dog from getting out of the harness.
- Additional exemption for males.
- Supplied with **riggerplate and carabiner** with rubber stopper, which make it difficult to disconnect the carabiner from the riggerplate.
