

EDGE PROTECTOR

ALU - EDGE PROTECTOR ZIMBA

Professional rope - edge protection made of polished aluminum die-cast elements.

Minimal rope friction due to large contact surface and polished surface.

High tipping stability thanks to wide support bars and raised side bolsters.

Five cable guide grooves offer good guidance even with an inclined cable pull. Rope deflection from 0 ° - 180 ° possible. Aluminum dissipates heat optimally due to its physical properties - this **prevents the rope from heating up** even under the highest loads.

The edge protection is **absolutely maintenance and wear-free**, since it has no moving parts.

Articel No.: 93436

Weight: 1,5 kg

Art. No.	93436	
Dimensions	Length:	350mm
	Width:	160mm
Weight	1,5 kg	

ANCOR POCKET WITH EDGE PROTECTOR

Robust bag for ground anchoring - ground rails and pegs.

With **integrated edge protection** made of sturdy 640g / m² polyplane.

Wide range of use by simply resting and securing the mat on the eyelets using a cord at the attachment point.

Area of application forest, meadow and gravel area.

Artikel No.: 95104

Gewicht: 1,1 kg (without PEG, Ancor)

Art. No.	95104	
Dimensions	Length:	1.250mm
	Width:	750mm
Weight	1,1 kg
