

TYRled - Mobile LED Light

Total height approx. 32 cm. Flexible tripod for many setup options.

Easy to use and can be attached to terrain, rocks and trees or on skis in winter (stuck in the snow) thanks to a flexible, rubber-armored tripod.

Full interchangeability of all parts thanks to the modular principle. Lamp head eg. can also be attached elsewhere using a GoPro bracket.

High luminosity with 2100lm or 3200lm. Power 0.3 to 28 watts illuminates every stone / rock / tree / snow surface. Brighter than a conventional car headlight. Narrow beam pattern with 26 degrees for targeted illumination of the area to be walked on.

Narrow search cone ensures good visibility over long distances.

Bright illumination of the scene of the accident without a headlamp.

Range up to 270m. 10 different dimming levels possible. Additionally, SOS, Flash RVLR or the Alpine emergency signal can be set.

Low weight and packing volume for easy transport with approx. 0.8kg. Delivered in a pack sack.

Long burn time due to powerful batteries from 1.45 to 150 hours Extension cable for battery 120cm and charger Waterproof up to 2m and shockproof up to 2m.

Using GoPro Adapters- diverse mounting options and easy handling.
